UNIVERSITY OF ARIZONA CONSTRUCTION NOTICE

Bioscience Research Lab (BSRL)

Project Overview

Construction of the Bioscience Research Lab (BSRL) building is scheduled to begin in December and continue through Spring 2018. The new building will be located along Cherry Ave, adjacent to the Keating BIO5 and MRB buildings. Throughout the project, DPR Construction will provide weekly BSRL Newsletters with up-to-date progress and notices of upcoming changes. Please forward these newsletters to others in your organization.

In the meantime, Southwest Gas will be installing a new pipe in Cherry Ave. in November, prior to the BSRL project. So DPR is launching the BSRL Newsletter now to establish the communication channels and provide information about the temporary lane closures on Cherry. Message distributed by the University of Arizona Planning, Design, and Construction

Your copy of the first BSRL Construction Newsletter is attached.
